

Lampa Stampa is an engaging card game that takes you on a delightful journey through the captivating world of Malta's most recognisable sights and objects. Suitable for players of all ages, Lampa Stampa combines observation, quick thinking, and a fair share of friendly competition.

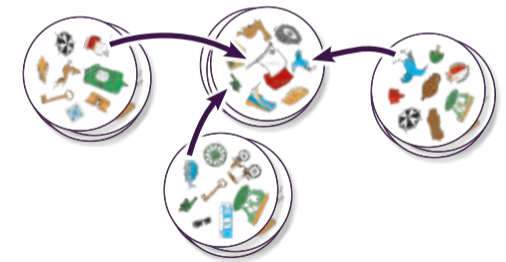

Whether you're a local familiar with the iconic imagery of Malta or a curious visitor eager to discover its cultural heritage, get ready to immerse yourself in an exciting game that celebrates the beauty and diversity of the Maltese islands.

OBJECTIVE

Be the fastest player to match and call out the symbols. Then collect or discard your cards depending on the game you're playing.

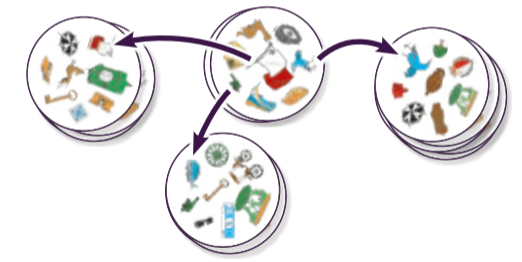

STACK

Shuffle and deal the cards. Place the last card in the centre face down. Reveal the centre card. Players swiftly play cards onto the centre card by calling the matching symbol. The first player to empty their pile of cards is declared the winner.

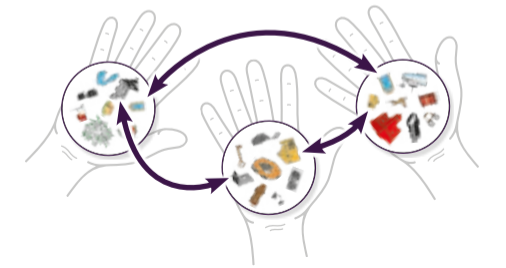

SNATCH

Shuffle and deal one card to each player. Place the remaining pile face-up in the centre. Players who match their card with a symbol in the centre collect the middle card and place it on top of their pile. The player with the most collected cards wins.

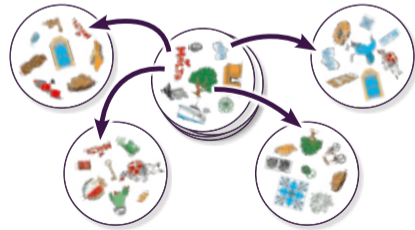

HAND GRENADE

Shuffle the cards and place them face down in the centre. All players pick one card from the deck and proceed to flipping their cards allowing the other players to see each other's cards. Match symbols with other players' cards, placing them on top of their pile. The round continues until only one player is lumped with all the cards. Repeat the process until the deck runs out. The player with the least number of cards wins the game.

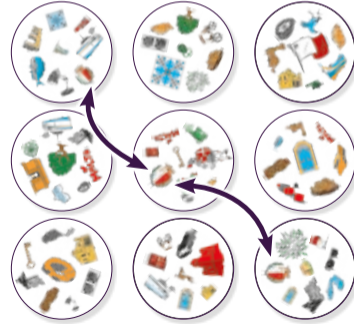

HOT POT

Shuffle the cards and place them face up in the centre. Each player collects one card from the deck. Players reveal their cards ensuring visibility to all players. The goal is to match a symbol on the centre card with that on any other player's card. When a match is found, the player places the centre card on top of the other player's card. The game proceeds as players continue to search for new matches. The player with the fewest cards in their possession wins.

TREBLE

Shuffle the cards and deal out 9 cards in a grid. Players need to find and collect three cards with a common symbol between them. The collected cards are then replaced from the deck. The player with the highest number of cards wins.
